plus Environ Skin Care

Treatment by Anna Petropoulos, MD,FRCS

The New England Facial and Cosmetic Surgery Center Botox® Treatment & Environ Skin Care Regimen

Detailed Treatment Description

Notice the ability of **Botox**® to create a more relaxed and youthful appearance: Botox has erased the forehead and frown lines, softened the upper lip and marionette lines, and created a gentle brow lift, as well as a less angular, softer and more gentle chin. Restylane has softened the nasolabial folds and enhanced lip definition. The Environ skin therapy program rejuvenated the skin, giving it an even, glowing and youthful appearance.
